- Fix issue - Forward DSS key
- Fix issue -when a call is received while on a conference
- Fix issue - Issue with transfer UI on LCD
- Fix issue - Cancel button transfers call
- Fix issue - Garbled audio after page
- Fix issue - Second reboot after manual provisioning
- Fix issue - get 3CX logo from HTTP server which is domain type

Version: 1.0.3.66

New Add Features

- N/A

Bug fixes

- Fix issue - Call is active and a page sent can hang up page mistakenly
- Fix issue - Incorrect history dialing issue
- Fix issue - Headset light out of sync issue
- Fix issue - Directed call pickup not working with multiple calls
- Fix issue - Phone switching to speaker mode erroneously
- Fix issue - Resume call fails with system hold
- Fix issue - Auto Answer with screensaver leads to incorrect softkeys

- Fix issue - INFO update support missing
- Fix issue - Speaker mode is showing during headset mode
- Fix issue - When blind transfer made by DSS key
- Fix issue - Shared Parking BLF button on EXP UC40 is not working properly
- Fix issue - Caller and callee BLF buttons on EXP UC40 are blinking
- Fix issue - Unexpected additional step during attended transfer
- Fix Stun issue with 3CX

Version: 1.0.3.65

New Add Features

- Support Redial mode –Select Mode
- Support -- Save then download Sscreen of LCD

Bug fixes

- Fix issue: ring volume is 0, answer incoming call, user can hear a short ringtone
- Fix mute issue when multi-calls
- Fix ring silence issue when multi-calls
- Fix DNS NAPTR issue when DNS Resolve fail
- Fix BLF issue – when set a few Dsskeys to the same extension
- UnSubscribe on reboot
- Fix issue - cannot restore to factory setting when it doesn't connect to network
- Modify Xmlcfgtemplate.xml
- Fix issue in feature.htm
- Fix DND issue of UC804/UC840/UC842
- Pree Line key can make hotline call
- Fix issue - After factory reset the phone is not sending "unregister" and "unsubscribe" messages
- Fix Auto-Answer Issue, when AutoAnswer, a new call coming, the new call will call-waitting

Version: 1.0.3.64

New Add Features

- Support tenAlert Ring settings
- Change the User Agent from "Hanlong" to "Htek"

Bug fixes

- Fix issue:3CX - Htek phone went to "abnormal" stage when received a call from Queue
- Fix issue: 3CX - When Htek phone receives an SIP CANCEL message with "Reason" header and

"cause=200" value inside (which means "Call completed elsewhere"), it should not show that call as a missed call

- Fix issue: Answer call by picking up the handset (not speaker), Press Transfer (or Conference) button from Htek phone then Press "Cancel", Result will be that phone will hang and a reboot is required.
- Fix issue: when Pickup the handset and leave it for a time , it's suppose to give busy tone then terminate the tone , and when any body call the phone it suppose ringing normally
- Fix User-Agent issue
- Fix issue: It is possible to create the "ghost calls" using the Htek phones
- Fix AutoAnswer Issue, After AutoAnswer, any new call will be call-waiting
- Fix issue: After factory reset the phone is not sending "unregister" and "unsubscribe" messages

Version: 1.0.3.63

New Add Features

- Support multiple multicast page zones
- INFO message based display update support
- specifying a min and max RTP port
- Support provision the remote phonebook and logo using HTTPS

Bug fixes

- Fix issue:3CX - Shared Parking BLF button is not working properly
- Fix issue: 3CX - Caller and callee BLF buttons are blinking
- Fix issue: Greece time zone is wrong
- Fix issue: 3CX - No Alert-Info implementation
- Fix issue: 3CX - disable "Transfer history"
- Fix issue: 3CX - After call transfer and call pickup the numbers on the phone's display are not updating
- Fix XML Browser issue
- Fix issue: https does not work for auto-provisioning
- Fix DNSSRV priority issue
- Fix issue: Call ring tone plays in handset during a call when a new call rings in
- Fix issue: Serious call audio distortion
- Fix issue: Call park failure to retrieve call
- Fix Directed Call pickup issue
- Fix MWI dial tone issue

- Fix issue: Label is misspelled as lable on webui page
- Fix issue: DNSSRV fails with TLS
- Fix issue: DND DSS key has no lamp. Lamp should be green when DND is off and red when DND is on.
- Fix issue: Multicast paging inbound lists the IP and port of the sending phone twice on the lcd
- Fix issue: off hook then hang up a call by pressing cancel button. Then make a new call the phone will go back to speaker mode
- Fix issue: If a call is active or put on hold and a multicast page is sent, it leads to a bad state. caller can talk to me one way but I talk to the page zone. Hanging up the page then I cannot pick the call back up or use cancel.
- Fix issue: Call resume fails. call a phone using any method. Call another phone using BLF. Use the up arrow to go to the first call, resume does not work.
- Fix issue: If a call record is in progress, taking phone off hook or pressing speaker button will cause the record graphic to disappear although recording continues.
- Fix issue: If a monitored extension is calling pressing its blf key will not pick up the call. Instead it forwards the caller to himself.
- Fix issue: When sending a multicast page in speaker mode, the display indicates handset mode
- Fix issue: If headset mode is activated then a call is placed, the screen shows a speaker indicating speaker phone even though the phone is in headset mode
- Fix issue: Pressing the headset button in a call toggles between headset mode and handset mode when the handset is in the cradle. Should go to speaker mode at this point.
- Fix issue: If a 3 party conference is put on hold, the softkey options are 'resume' and 'cancel'. The cancel button does nothing.
- "HideDTMF" while on a call
- Fix issue: DND DSS key does not stay on across reboot. Turn on DND, and reboot the phone. DND setting gets reset.
- Fix issue: If a call is ringing in when outbound page is on, rejecting the call also ends the page. However, the paging DSS key LED won't turn off.
- Fix issue when Outbound multicast page is on, and an incoming call is received.
- Fix issue: Busy Forward is automatically activated if there is an active call on the phone on any line. No reject is required. Ideal behavior is to provide call-waiting and activate the forward only if the user rejects the call.
- Fix issue: If a call is on the phone and no answer forward is executed, none of the soft keys or reject buttons function for the existing call any longer.

- Fix issue: If a call is on the phone and a call comes in that is manually forwarded, none of the soft keys or reject buttons function for the existing call any longer.
- Fix issue: In the above two forwarding cases, if the EXT2->EXT1 call is hung up at EXT2, the call appears to remain up on the Hanlong Phone
- Fix issue: https based XML browser URLs cause the phone to freeze.
- Fix issue: Multiple DSS keys for forward cause DSS key LED to go out of sync.
- Fix issue: Phone froze during outbound multicast paging. This occurred while alternating between inbound/outbound pages
- Fix issue: RTP port range (difference between max and min) is forced to be a minimum of 100. This minimum needs to change to 1.
- Fix issue: Display name field for an extension in the web UI does not allow spaces.
- Fix issue: If you answer a call with headset button then hang up the call, the phone will display a graphic indicating you are still in headset mode but you are not.
- Fix issue: Garbled audio when a page barges a call and you resume the call
- Fix issue: If you attempt to change an outbound page from handset to speaker mode it hangs up the page
- Fix issue: If an inbound page is active and a call is received, when the page is ended the call loses audio

Product Model: UC862/UC842/UC860P/840P/806P/804P/803P/802P

Version: 1.0.3.62

New Add Features

- Multicast paging support
- XML Browser
- Add setting -- "Dial First Digit": can set to "Screensaver Wakes up" or "Screensaver Wakes up and Dial"
- DialPlan also support "On Hook Dial"
- Support "Talking -> CONF -> New Call -> CONF" conference mode
- Add methods so user can reboot or restart a phone using the phone's keypad
- Support "HeadSet Priority"
- Support "Ringer Device For HeadSet"
- Support "Dial-now Time-out"
- Add SIP Diversion header when forward the call
- Programmable key customization allow to customize label

- Support to connect UC40 expansion module
- Alert-info could be configured (same way with Snom)
- Support to upload configuration file in the format of cfg&Mac in webpage
- Support Broadsoft phonebook
- Support Network Call log
- Popping-up the confirmation prompt box when factory reset on the webpage
- Add DHCP VLAN option on LCD
- Username and Password of Auto-Provision phonebook supports format of:
protocol://username:password@www.host.com/fw
- Add preview function for screensaver pictures
- Support multi-languages for network, register status on the webpage
- Support Auto Redial
- Add boot, languages on LCD Menu-Status
- Add Restart, Reboot for expansion board on webpage

Bug fixes

- Fix issue: Mid call, if DTMF digits are pressed fast, then some of the digits do not go out on the wire (RFC 2833 digits not sent)
- Fix issue: If MUTE is ON while on speaker during a call, the call will drop after 5 minutes with media time out
- Fix issue: If MUTE is ON while on a call and another call rings in, the call gets un-muted even though the LCD shows a big red MUTE icon
- Fix issue: Caller-ID presented on LCD uses SIP Contact header information instead of using From or P-Asserted-Identity. Wrong caller-id is displayed
- Fix issue: For BLF lamp indications to work, the phone needs an extra restart. This is because no BLF subscribes are sent on config fetch or hitting save on web
- Fix issue: BLF LED indication works intermittently across restarts.
- Fix issue: Hitting the X button with a call on hold causes the LCD to go Blank. If you hit X multiple times at this time it crashes (restarts) the phone
- Fix issue: Hitting the BLF key while on an active call does nothing some times. Other times it places a call to the BLF extension and puts the active call on hold. At this point it should you Transfer and Cancel and both keys behave the same (i.e. they both transfer the call)
- Fix issue: Attended transfer fails if there is only 1 line provisioned for an account/extension. You need to provision multiple line keys for attended transfer to work which should not be the case.
- Fix issue: Cannot place multiple calls if there is only 1 line provisioned for an account/extension.

- Fix issue: When screensaver is showing, go off-hook and then on-hook immediately using handset. UI shows idle screen but soft-keys show Send, 123, Delete and Cancel. Have to repeat this again (off then on hook) to get back to correct state.
- Fix issue: If a call is on hold and an intercom call comes in, the intercom caller goes directly to voicemail
- Fix issue: SIP messages are not sent in syslog messages even under highest debug level. Need to be able to see the entire SIP message in syslog DEBUG mode.
- Fix issue: LCD icons for missed-call-notification and call-forward-always are the same
- Fix issue: No LCD indication for call record. Key flashes when record is on. No light when record is off
- Fix issue: Setup Forward on Busy and place a call to the phone. Press the X key. The call does not get forwarded
- Fix issue: Pressing voicemail key when you go off hook on Line key 2 programmed for Account 2 still dials out to voicemail as Line 1 for Account 1
- Fix issue: Always forward function is forwarding to the phone number provisioned in the forward DSS key and not the one provisioned using the phone's Menu->Features->Call Forward->Always Call Forward key – intermittent
- Fix issue: Call waiting tone beeps once. It needs to be repeatable
- Fix issue: Phone always chooses its highest priority codec during negotiation on incoming call.
- Fix issue: green check button does not answer calls
- Fix issue: Feature-Key-Sync option is available in the web UI, but not in Autoprovisioning XML file
- Fix issue: If there are 2 accounts on a phone and Account 1 calls Account 2 and the call is answered the LCD goes blank
- Fix issue: No autoprovisioning support for URL for screen saver or screen photo
- Fix issue: No autoprovisioning support for Forward-No-Answer-Ring-Timeout
- Fix issue: Setting->Softkey Layout is not autoprovisionable
- reduce ringing volume when it is "1"
- Fixed the issue that Name would show in “Name” when in calhold
- Fixed the issue that phone would hang when import the configuration file in initializing process
- Phonebook size support 256K in maxium
- Fixed the bug of Delelte key in calling status
- Fixed the softkey show issue when dial out
- Fixed the issue of clicking on-hook and Action URL on-hook on webpage
- Fixed the issue that webpage is not aligned in several browsers

- https get -- “trunked” support
- GetPhoneBookByHTTPS insures the accuracy of documents
- Fixed the issue that it is in wrong document when save the linekeys configuration
- Fixe the issue of line-choosing

Product Model: UC862/UC842/UC860P/840P/806P/804P/803P/802P

Version: 1.0.3.61

New Add Features

- Firmware file—prefix Postfix control
- Support Polish both for webpage and LCD
- Support AutoProvision Phonebook
- Allow G.726-32 to negotiate Payload Type
- Support Yes or No for Rport, RFC2453 Hold
- Support Multi-language forFunction keys on webpage
- Support BLF OFFLINE status—LED Off
- Support custom configuration for UserAgent of SIP/HTTP INFO
- Add wallpaper config on webpage(Setting)

Optimization

- Optimized the speed of onhook dial for UC806P804P/803P/802P
- Optimized the cfg\$mac content
- Optimized the time update that update the time as soon as get DHCP Option 42, Option 2
- Optimized the screensaver operation on LCD.

Bug fixes

- Fixed the help information on webpage
- Fixed the SIP PnP Auto-Provision issue
- Fixed the issue of wallpaper saving
- Fixed the DSS DTMF Key issue
- Fixed the memoty leaks issue that cause by repetitive operation of conference-split
- Fixed the wrong display of firmware version when start the IP Phone without connection with internet
- Fixed the DHCP Option 128/150/66 AutoProvision

Product Model: UC862/UC842/UC860P/840P/806P/804P/803P/802P

Version: 1.0.3.60(2014-3-26)

New Add Features

- Support Hold Transfer On Hook
- Support Direct IP Call via Speed dial Key
- Support HTTPS Upgrade
- Support wallpaper customized by adding more wallpaper in Icon.tar.
- Support logo on webpage customized
